

Energy Management

COIM Group recognizes that the use of energy imposes environmental and social problems by depleting resources and contributing to climate change.

COIM Group is committed to responsible Energy Management, optimizing energy use, improving cost-effectiveness and productivity and reducing waste associated with energy use.

COIM Group promotes the efficient use of energy to produce and deliver its products to its customers, taking into consideration all the possible consumption generated.

COIM Group guarantees:

- ⚙️ The commitment of compliance with relevant legislation, regulations and other relevant requirements.
- ⚙️ The commitment to monitor energy use in order to seek realistic targets of improvement in the highest consumption installations.
- ⚙️ The commitment to obtain adequate and reliable energy supplies implementing adequate contingency plans that prevent any supply interruption.
- ⚙️ The commitment to develop future manufacturing processes and related service activities that take into consideration the associated energy consumption.
- ⚙️ The commitment to take into consideration the highest energy-efficient design standards in all new buildings.
